Bio

He became interested in computer graphics with the software Dr.Halo when it was the era of XT computers. He was into computer hardware and software, which encouraged him study electrical engineering at Korea University. He started his experience in the web design and web solution development around 1999, when the venture companies and internet came up.

After the military service and graduation from the university, He worked at Samsung Electronics as a software research engineer, in the Telecommunication R&D Center, focusing on the user interface for the next generation and GSM/WCDMA mobile phones. Fortunately, He could get closer to design again while working on the GUI(Graphic User Interface) of the mobile phones.

After having experience as an engineer, he studied visual communication design at SADI(Samsung Art & Design Institute), and now is studying at Parsons The New School for Design, in MFA Design & Technology, having interests in the synergy between design & technology.

Courses Taken

Major Studio: Interface
Collab: Data Visualization
Independent Study: Locative Game

Internships

Mobile Rich (2009.6-8)
Glimmer Studio (2009.1-2)

Social networking

Tags

interface, mobile, platform, iphone, android, information design, data visualization, ipad, 3D graphics, computer graphics, opengl, tangible interface, cityscapes, drawing, interiors, landscapes, New York City, oil, painting, pastel, portraits, water towers, watercolor

Recent Works

Daily Traces

2010

Interactive visualization of music spectrum/frequency
